Bella Turner

bella.turner@email.com | +1-617-555-0128 | Cambridge, MA

PROFESSIONAL SUMMARY

Robotics Software Engineer with 6 years developing autonomous systems for industrial and research robotics. Expert in motion planning, control systems, and ROS ecosystem.

SKILLS

Python | C++ | ROS | ROS2 | SLAM | Motion Planning | MoveIt | Control Systems | Computer Vision | Gazebo | OpenCV | Point Clouds | Navigation | Manipulation | Simulation

PROFESSIONAL EXPERIENCE

Robotics Software Engineer - RoboSystems Inc. (2020 - Present)

- Developed autonomous warehouse robot navigation system achieving 99.8% success rate.
- Implemented SLAM algorithm reducing localization error by 60%.
- Built ROS2 control stack for 6-DOF robotic arm with sub-millimeter precision.

Junior Robotics Engineer - AutoBot Labs (2018 - 2020)

- Developed path planning algorithms for mobile robots in dynamic environments.
- Integrated computer vision for object recognition and grasping.

EDUCATION

M.S. Robotics | Carnegie Mellon University (2018)

B.S. Mechanical Engineering | MIT (2016)
