Chris Evans

chris.evans@email.com | +1-617-555-0129 | Boston, MA

PROFESSIONAL SUMMARY

Bioinformatics Scientist with 7 years applying computational methods to genomics and drug discovery. Expert in sequence analysis, ML for biology, and large-scale genomic data pipelines.

SKILLS

Python | R | Biopython | Nextflow | Snakemake | GATK | BWA | STAR | DESeq2 | Pandas | NumPy | Bash | HPC | AWS | Machine Learning for Biology

PROFESSIONAL EXPERIENCE

Senior Bioinformatics Scientist - GenomicsTech (2019 - Present)

- Built end-to-end genomic variant calling pipeline processing 10,000+ patient samples.
- Applied ML models for cancer biomarker discovery achieving 88% sensitivity.
- Reduced pipeline runtime from 72 hours to 8 hours through parallelization.

Bioinformatics Analyst - BioData Inc. (2017 - 2019)

- Performed RNA-seq analysis for 50+ clinical studies.
- Developed automated quality control pipeline for NGS data.

EDUCATION

Ph.D. Computational Biology | Harvard University (2017)

B.S. Bioinformatics | UC Santa Cruz (2012)
