PROFESSIONAL SUMMARY

Database Architect and Backend Engineer with 8 years designing high-performance database systems. Expert in PostgreSQL, MongoDB, and distributed database architectures.

SKILLS

PostgreSQL | MySQL | MongoDB | Redis | Elasticsearch | Cassandra | Python | Java | SQL | Database Design | Query Optimization | Sharding | Replication | TimescaleDB | ClickHouse

PROFESSIONAL EXPERIENCE

Database Architect - DataSystems Inc. (2019 - Present)

- Designed sharded PostgreSQL cluster handling 5M writes/second.
- Optimized complex SQL queries reducing average query time from 30s to 200ms.
- Implemented ClickHouse for analytics workloads processing 1TB/day.

Backend Engineer - ScaleDB (2016 - 2019)

- Built Elasticsearch search platform indexing 100M+ documents.
- Implemented database replication and failover achieving 99.99% availability.

EDUCATION

M.S. Computer Science | NYU (2016)

B.S. Information Systems | Rutgers University (2014)
