Uma Krishnan

uma.krishnan@email.com | +1-512-555-0121 | Austin, TX

PROFESSIONAL SUMMARY

Embedded Systems Engineer with 9 years designing firmware and hardware-software interfaces for IoT and automotive systems. Expert in C/C++, RTOS, and CAN bus protocols.

SKILLS

C | C++ | Python | RTOS | FreeRTOS | CAN bus | SPI | I2C | UART | ARM Cortex | Linux Kernel | Device Drivers | AUTOSAR | Automotive | IoT

PROFESSIONAL EXPERIENCE

Senior Embedded Engineer - AutoTech Systems (2018 - Present)

- Developed AUTOSAR-compliant ECU software for electric vehicle battery management system.
- Reduced boot time of embedded Linux system from 45s to 8s through kernel optimization.
- Led team of 5 engineers delivering safety-critical firmware for ISO 26262 certification.

Embedded Engineer - IoTWorks (2015 - 2018)

- Developed RTOS-based firmware for industrial IoT sensors.
- Implemented low-power algorithms extending battery life from 1 to 5 years.

EDUCATION

M.S. Electrical Engineering | UT Austin (2015)

B.Tech Electronics | NIT Trichy (2013)
